

The Security Features

The Noah's Ark gold bullion coin is packed with a refined certificate of authenticity, including consecutive numbering, in a security capsule that can only be opened by destruction.

A special feature for collectors and investors is the reverse of the certificate with an annually changing motif. The overall appearance of the coin and its packaging stand out due to the high-quality paper finishing and the unique design compared to other investment coins.

The Motif

The obverse side of this exclusive coin edition depicts the Armenian Coat of Arms. Underneath is the face value of the coin in Armenian Dram, the fineness, the weight and the year of issue of the coin, next to the symbol of the mint. The lettering the „Republic of Armenia“ in Armenian and English language surrounds the ensemble.

The reverse side depicts the Noah's Ark in the center of the motif. The white dove with an olive branch in the beak is flying towards the ark. The silhouette of Mount Ararat with a rising sun is shown in the background. The inscription is also the name of the coin: "Noah's Ark" in Armenian and English lettering is minted around the beautiful motif.

From the animal world of Noah's Ark, Armenian brown bear (*Ursus arctos syriacus*) takes center stage in 2025 and adorns the certificate in all four coin sizes.

The four Noah's Ark bullion coins in gold are issued annually by the Central Bank of the Republic of Armenia. As legal tender in Armenia, the production is subjected to the strict requirements of the Central Bank: purity of the precious metal, weight and quality of the minting are tested and guaranteed by the Armenian state.

The Mint

The Noah's Ark bullion and collector coins are manufactured in one of the most modern private minting sites in Germany. All raw materials used to manufacture these gold and silver coins come exclusively from manufacturers they are certified and approved according to the standards of the London Bullion Market Association (LBMA).

Every single coin is manufactured in a complex process from the granules to the finished product by the Leipziger Edelmetallverarbeitung GmbH and is subjected to strict quality control.

Noah's Ark made of the finest silver

The bullion coin is made of pure fine silver (999 / 1000) and is available in seven sizes. This allows every investor to configure free and flexible the scope of his value investment. The investment in precious metal is an investment in lasting and secure values.

This silver coin is available in seven sizes: ¼ oz, ½ oz, 1 oz, 5 oz, 10 oz, 1 kg and 5 kg.
